NANOLIPOSOMES

NAD⁺ REJUVENATION FACIAL MASK

NANOLIPOSOME TECHNOLOGY

Refers to a technology where the active ingredients is encapsulated in phospholipids.

Liposomes is a spherical capsule formed by phospholipids, it can effectively encapsulate and protect the active ingredients from external damage.

TECHNICAL ADVANTAGES

1. INCREASE THE STABILITY OF ACTIVE INGREDIENTS

Can protect the active ingredients from the effects of external factors

2. INCREASE PERMEABILITY

Due to the nature of liposome, it can penetrate the skin barrier much more effectively

3. EXTENDED RELEASE

Liposome can regulate the metabolism of the active ingredients, extending the effectiveness

4. REDUCES IRRITATION

By encapsulating with liposomes, it can reduce some irritation to the skin, thus it is ideal for sensitive skin.
